OT Evaluation and Treatment Entered On: 4/29/2025 9:28 EDT
Performed On: 4/29/2025 8:48 EDT by Gulde, Sara T, OTR

Assessment and Plan

Patient Location : 5115
Assessment Comments : Patient presenting with confusion; patient admitted with UTI and encephalopathy. Prior to admission, patient was at SNF for rehab (Bethal Pointe). Prior to hospitalizations and rehab, patient reports living with spouse, who assist with lower body dressing and footwear at baseline; patient reports independence with feeding, grooming, upper body dressing, bathing, toileting, and toilet transfers. Patient reports independence wiht mobility with front wheeled walker; however, patient reports he needs assistance with bed mobility. Patient is presenting with generalized weakness, decreased activity tolerance, decreased balance, and cognitive deficits that are limiting patient's safety and independence with occupational performance; patient is currently requiring supervision to min assist for upper body ADL, mod to max assist for lower body ADL, and supervision to min assist for functional transfers and mobility. Patient will continue to benefit from skilled OT Interventions to maximize independence, decrease burden of care, and optimize quality of life.

Impairments/Limitations : Activity Tolerance Deficits, Balance Deficits, Cognitive Deficits, Impaired Adjustment to Limitations, Impaired ADL/IADL Skills, Impaired functional mobility, Strength Deficits, Transfer Deficits
Treating Diagnosis : Weakness/Disuse Atrophy
Rehabilitation Potential : Good
Barriers to Safe Discharge : Medical Diagnosis, Past Medical History
Frequency : 3 Times a Week
Rehab Plan of Care Statement : Therapist may change frequency of treatment when deemed necessary and appropriate
Duration : 2
Duration Unit : Weeks
Interventions : Adaptive Equipment, ADLs/IADLs, Balance, Energy Conservation, Functional Cognition Skills, Functional Mobility, Home exercise program, Positioning, Therapeutic Activity, Therapeutic exercise
Pt/Caregiver Involved in Goal Setting & Tx Plan : Yes

Gulde, Sara T, OTR - 4/29/2025 9:17 EDT

Recommendations

Disposition Recommendations : Continued therapy flexing to patient tolerance
Recommended Equipment at Discharge : To Be Determined

Gulde, Sara T, OTR - 4/29/2025 9:17 EDT

History

Preferred Name : Steve
Referring Physician : Abbood, Hayder, MD
Patient Precautions : Fall Precautions
Information Given By (Patient History) : Patient, Healthcare Provider, Medical Record
Pertinent Medical History/Hospital Course : PMH: depression, HTN, HLD, GERD, BPH

Home Environment : Yes
Home Equipment : Yes

Gulde, Sara T, OTR - 4/29/2025 9:17 EDT

ADLs (PLOF)
Feeding : Independent
Grooming : Independent
Bathing : Independent
Dressing : Requires Assistance
Toileting : Independent
Bed Mobility : Requires Assistance
Transfers : Independent
Functional Mobility : Independent
